## Director's Welcome

The Institute of Neurosciences aims to promote research in neurosciences from a global perspective and boost collaborations among research groups in this field. Our Institute was officially launched in December 2015, and inaugurated through an Opening Session which took place at the Medicine Campus on the 20th of September 2016. In order to strengthen the synergies between the groups that form the Institute, and to give internal visibility to our research and encourage the exchange of experiences between researchers.

The integration of researchers from four campuses has provided the Institute with a cross-sectional view and in 2016 this effort was validated through 350 academic publications, 6 M€ of external funds, and 7 registered patents.

**Our mission is focused on scientific excellence and international projection,** promoting challenging and highly competitive research programs. Our Institute has been ranked 34<sup>th</sup> in the US News Best Global Universities Ranking, and the excellence of the investigators has been acknowledged with one ERC Starting Grant and one ERC Proof of Concept. Within our members we count with the collaboration of 4 ICREA Research Professors and 4 ICREA Academy Professors.

Our main efforts are driven to align our research activities with the Responsible Research and Innovation guidelines fostered by the European Commission. Our research activity addresses the societal challenges about health, wellbeing, education and knowledge transference, in a context of innovative and efficient scientific management. During this year the Institute has promoted a visualization program about transparency, transference and outreach, developing the website of the Institute, the current Annual Report, and participating in the 2<sup>nd</sup> Science Festival of the University of Barcelona and in the World Brain Week.

Our goal is to attract and promote young talent. Young researchers have the opportunity to join our Institute through a number of Master degrees and Doctoral programs from the University of Barcelona. We are especially concerned about training this new generation of neuroscientists. On the 15th of December we organized the first PhD Workshop of the Institute of Neurosciences at Mundet Campus, where master's degree students and early stage researchers could share their interests.

The present Annual Report gathers the research activity we carried out during 2016. There are seven main chapters, which describe our Institute and its research areas, list the people that make up the Institute, show the publications, projects and patents we performed, collect the news that were published in our website and summarize our Institute in numbers.

The goals and efforts we have made need to be the model to follow in the next years, a road of discipline integration and scientific excellence that leads the Institute of Neurosciences of the University of Barcelona to be a national and international model.

Sincerely,

A handwritten signature in black ink, enclosed in a small oval shape, likely belonging to Carles Escera.

**Carles Escera**

Professor of Cognitive Neurosciences  
Director of the Institute of Neurosciences

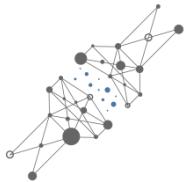

## Our Institute

**The Institute of Neurosciences of the University of Barcelona** gathers researchers who work on the **understanding of the central nervous system in all levels of analysis**, ranging from the biology of the neuron, through the formation of neural circuits, to the global function of the brain, which is the basis of cognition and behaviour. **This is the first Institute** of Neurosciences in the country **which integrates research lines in neurobiology, neuropharmacology, physiopathology, neurology, psychiatry, clinical psychology, neuropsychobiology and cognitive neurosciences.**

The Institute gathers about **300** researchers located in four university campuses: Mundet Campus, Barcelona Knowledge Campus, Medicine Campus - Hospital Clínic August Pi i Sunyer, and Bellvitge Health Sciences Campus

## Research Areas

### Neurobiology and Neuropharmacology

**Studies on cells and neural circuits of the nervous system in normal and pathological situations. Research in identifying new therapeutic targets and drugs to treat neurological disorders.**

The groups of this area analyze synaptic transmission and its implication in plasticity and memory, and the mechanisms that regulate the neural circuits. Other subjects of research are the identification of signals and description of the molecular pathways related to the development of the nervous system.

Ageing and neurodegenerative illnesses that entail neural death are also studied, determining the elements involved in the neural survival-death balance, such as the mitochondrial dynamics, synaptic activity and signaling pathways.

Most part of the research is oriented to the development of new drugs for the treatment of neurological pathologies. In this sense, researchers of the area are interested in analyzing the pathways to target cells through the blood-brain barrier.

## Physiopathology of Nervous System Diseases

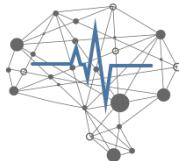

**Defining the physiopathological mechanisms involved in the loss of functionality, atrophy and neurodegeneration related to these diseases. A deeper understanding of these mechanisms will allow us to develop new therapeutic strategies to delay or prevent these neurological disorders.**

Researchers in this area study the neurodegenerative processes during ageing, in particular those molecular mechanisms involved in Alzheimer's disease and its possible causes, such as the environmental factors. Type 2 Diabetes or possible targets for drug treatment are also researched topics. Other groups are interested in finding new treatments for Huntington's disease, using pharmacological and cellular therapy.

There are research lines oriented towards the development of new therapeutical tools for pain treatment, new pharmacological targets and diseases related to the skeletal muscle, the retina or dystrophies affecting the myelin.

## Cognitive Neuroscience and Neuropsychology

**Doing research on the neurobiological substrates underlying cognition to unravel the neural circuits involved in mental processes. Neuropsychology groups focus on the clinical application of this knowledge using neuroimaging techniques, genetic studies and cognitive tests.**

The research in this area is oriented towards a comprehension of the cerebral mechanisms of auditory perception, attention and music processing. We are interested in disentangling the pathways that allow us to unravel the sensory stimuli and numeric information.

The decline of cognitive capacity during ageing, neural reorganization pathways after trauma and recovery are other studied topics. We also study the effects and neurological bases of dyslexia, cerebrovascular diseases, obesity, severe mental disorders and substance abuse, working with patients.

## Cognition, Behaviour and Computation

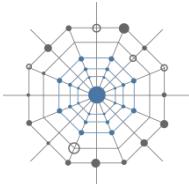

**Mechanisms of human and animal behaviour underlying different cognitive processes. Computational research and modelling analyses on studies of behavior, cognition and conservation, from an evolutionary and comparative perspective.**

We study the cognitive processes involved in language learning in babies and adults, and episodic memory in both healthy individuals and brain-damaged patients. We examine motor function, decision-making, problem-solving, emotion and reward.

Computation research is applied to both human and other animal models, in order to study orientation, navigation, and spatial memory. We develop computational models and algorithms to simulate the behavior and collective movements of groups like shoals. Moreover, we work on behavior and conservation from an evolutionary perspective developing comparative studies in primates, both in captivity and in the wild.

## Clinical and Applied Psychology

**Identification, analysis and intervention of human behaviour disorders, both at individual and at group levels. We are especially concerned with psychological problems which affect people's quality of life, as well as with the social repercussion of these disorders.**

We study the tools that are used for the diagnosis and evaluation of psychological disorders, and apply statistical techniques in order to develop models and improve such tools. We develop tools for the prediction and prevention of violent behavior. We study how to improve the quality of the elderly, and do research on new virtual reality applications for the treatment of psychological disorders, such as anxiety or phobias.

## Neurology and Psychiatry

**The study of the nervous system in normal conditions and in presence of neurological or psychiatric disorders. The main goals of our research lines are the study of severe psychiatric disorders, the neurological disorders and their histopathological basis, and the development and assessment of new therapies.**

Researchers of this area study the molecular and neural mechanisms of chronic pain, inflammation and brain damage. Other lines examine the glutamatergic signals and proteins that are involved in the synapse, the ion channels in glaucoma and sleep-related disorders. We study the neurobiological mechanisms and develop treatments for several neurodegenerative disorders such as Parkinson, autism, bipolar disorder and several psychoses.

## Events

### Opening Session

The Institute of Neuroscience's opening session took place at the Medicine Campus, on the 20<sup>th</sup> of September 2016. The act was presided over the rector of the University, Dídac Ramírez, who reminded the attendants that, "The Institute of Neurosciences has to serve society" and emphasized that the centre will work from the responsible research and innovation perspective. The event counted with the participation of the vice-rector of research Jordi Alberch, who highlighted that "the Institute allows the potentization and international projection reaching one of the main challenges of the 21th Century, the study of human brain functioning. To fulfil this challenge we have to carry out multidisciplinary tasks that range from molecular and cellular biology to conduct studies, and the researchers at the Institute of Neurosciences of the University of Barcelona have the experience and skills to face these kind of studies".

The Institute's director Carles Escera, pointed out that the Institute creation serves as a platform to strengthen the synergies between current research groups of the university. In words of Escera "The institute was created as a platform to promote synergies between the existing groups in the University, so the advances in the different fields of neuroscience are able to have more projection and be more visible". The director hoped that the new institute would serve as an attraction pole for young talent wishing to develop careers in the neuroscience research. In this sense, he remarked that "The Institute is born with a cross-way structure which aims to engage and attract research talent". The Institute offers a platform so the researchers can build competitive teams in order to participate in international projects.

### PhD Workshop

On December 15<sup>th</sup> we celebrated the first edition of the PhD Workshop of the Institute of Neurosciences at Mundet Campus. The session aimed to inspire young researchers and students by exposing current and future opportunities and research possibilities.

From early in the morning the environment was exciting. Eighty students and early stage researchers attended to the conferences, which was held in the main room of the Theatre building. After the Director welcomed the attendants, six oral presentations, one per each research area were given by the early stage researchers of the Institute.

The poster session gathered 42 posters from the different field of neurosciences. Both, oral and posters presentation exposed excellent and breakthrough research, making notable the high potential of our young researchers.

Afterwards, the session addressed "*Future opportunities in the academic and the non-academic sector*" and were given by the researchers Dr. Costa Faidella, Dr. Soriano, Dr. de Diego-Balaguer and Dra. Verger-Maestre who encourage attendants to keep working on the state-of-the art of neurosciences.

The event ended with the award of the best poster by, which was delivered to Noemi Lamonja who presented *“Influence of the physical activity and genetics on cognition”*.

## Projects and Funds Granted in 2016

### Internationals Projects

#### European Union (EU)

##### *Horizon2020*

- 1. European Training Network for Cell-based Regenerative Medicine (Training4CRM)**  
Reference: MSCA-ITN-2016-722779  
PI: Alberch Vie, Jordi  
Agency: EU, H2020  
Duration: 01/11/2016-31/10/2020  
Amount: 247,872€
  
- 2. Healthy minds from 0-100 years: Optimising the use of European brain imaging cohorts (Lifebrain)**  
Reference: H2020-SC1-2016-RTD-732592  
PI: Bartrés Faz, David  
Agency: EU, H2020  
Duration: 01/01/2017-31/12/2021  
Amount: 435,028 €
  
- 3. Personified Self Interaction (PSI)**  
Reference: ERC-2015-PoC-712984  
PI: Slater, Melvyn  
Agency: EU, H2020  
Duration: 01/07/2016-31/12/2017  
Amount: 149,950 €
  
- 4. Human Brain Project Specific Grant Agreement 1 (HBP SGA1)**  
Reference: HBP SGA1 720270  
PI: Slater, Melvyn  
Agency: EU, H2020  
Duration: 01/04/2016-31/03/2018  
Amount: 13,125€

### National Projects

#### Ministry of Economy and Competitiveness (MINECO)

##### *Excellence/challenges*

- 1. Psicobiología de la patología dual**  
Reference: PSI2015-65026-P  
PI: Adan Puig, Ana  
Agency: MINECO  
Duration: 01/01/2016-31/12/2019  
Amount: 89,177 €

- 2. Nuevos indicadores en la fisiopatología de la enfermedad de alzheimer basados en componentes de la vía de secreción regulada**  
Reference: BFU2016-80868-R  
PI: Aguado Tomas, Fernando  
Agency: MINECO  
Duration: 30/12/2016-29/12/2019  
Amount: 157,300 €
- 3. La actividad física y el deporte como potenciadores del estilo de vida saludable: Evaluación del comportamiento deportivo desde metodologías no intrusivas**  
Reference: DEP2015-66069-P  
PI: Anguera Argilaga, M. Teresa  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 47,432 €
- 4. Efectos del entrenamiento cognitivo combinado con estimulación cerebral no-invasiva guiada por información funcional cerebral en el deterioro cognitivo leve**  
Reference: PSI2015-64227-R  
PI: Bartrés Faz, David  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 77,440 €
- 5. Comparación entre modelos lineales mixtos y modelos lineales mixtos generalizados: estudios de simulación y aplicaciones**  
Reference: PSI2016-78737-P  
PI: Bono Cabré, Roser  
Agency: MINECO  
Duration: 30/12/2016-29/12/2020  
Amount: 32,670 €
- 6. Desarrollo, diferenciación y maduración neuronal en la enfermedad de Huntington**  
Reference: SAF2015-66505-R  
PI: Canals Coll, Josep Maria  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 181,500 €
- 7. Contribución subcortical a la cognición auditiva**  
Reference: PSI2015-63664-P  
PI: Escera, Carles  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 112,167 €
- 8. Bases moleculares de patologías asociadas a canales de cloruro CLC y LRRC8**  
Reference: SAF2015-70377-R  
PI: Estévez Povedano, Raúl  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 266,200 €

**9. Organización temporal en memoria de la información de los acontecimientos episódicos**

Reference: PSI2016-80489-P  
PI: Fuentemilla Garriga, Lluís  
Agency: MINECO  
Duration: 30/12/2016-29/12/2019  
Amount: 104,060 €

**10. Cdk5 como nueva diana terapéutica y biomarcador del trastorno depresivo en la enfermedad de Huntington**

Reference: SAF2015-67474-R  
PI: Ginés Padrós, Silvia  
Agency: MINECO  
Duration: 01/01/2016-31/12/2018  
Amount: 217,800 €

**11. Integrando a las personas con esquizofrenia: una evaluación válida de la funcionalidad en diferentes contextos culturales**

Reference: PSI2015-67984-R  
PI: Gómez Benito, Juana  
Agency: MINECO  
Duration: 01/01/2016-31/12/2019

Amount: 19,500 €
- 5. Executive function training in childhood obesity: food choice, quality of life and brain connectivity (TOuCH)**  
Reference: 122/U/2016  
PI: Jurado Luque, María Àngeles  
Agency: La Marató de TV3 Foundation  
Duration: 01/01/2017-31/12/2017  
Amount: 186,216 €
- 6. Àmbit de l'execució penal, la mediació penal i l'atenció a la víctima**  
Reference:  
PI: Pereda Beltran, Noemí  
Agency: Ministry of Justice of Government of Catalonia  
Duration: 01/01/2017-31/12/2019  
Amount: 2,500 €
- 7. Skills Inventory for Higher Education Management**  
Reference:  
PI: Pero Cebollero, Maribel  
Agency: Institute of Education Sciences (ICE) - University of Barcelona (UB)  
Duration: 30/06/2016-02/12/2017  
Amount: 1,771 €

## Grants

- 1. Centre per a la producció i validació de teràpies avançades**  
Reference: TECDTP-15-1-0022  
PI: Canals Coll, Josep Maria  
Agency: Agency for Business Competitiveness (ACCIÓ)  
Duration: 30/10/2015-30/10/2016  
Amount: 43,767 €
- 2. Ajuts per impulsar la participació en projectes internacionals de recerca (2016) en el marc del programa Horizon 2020 i altres programes europeus**  
Reference:  
PI: Llorens Baucells, Jordi  
Agency: University of Barcelona  
Duration: 01/01/2016- 31/12/2016  
Amount: 6,000 €
- 3. Ajuts per impulsar la participació en projectes internacionals de recerca (2016) en el marc del programa Horizon 2020 i altres programes europeus.**  
Reference:  
PI: López-Moliner, Joan  
Agency: University of Barcelona  
Duration: 01/01/2016- 31/12/2016  
Amount: 8,000 €
- 4. Programa 'Salvador de Madariaga'**  
Reference: PRX16-00209  
PI: Mataró Serrat, Maria  
Agency: Ministry of Education, Culture and Sport  
Duration: 01/01/2017-30/06/2017  
Amount: 19,309 €
- 5. Herramientas digitales de evaluación, aprendizaje y reeducación de las funciones cognitivas en la infancia**  
Reference: F2I-MiR\_2016\_001  
PI: Serra Grabulosa, José María  
Agency: Bosch i Gimpera Foundation of the University of Barcelona de la Universitat de Barcelona  
Duration: 14/12/2016-13/06/2017  
Amount: 6,000 €
- 6. Immersive Cerebral and Orthopedic Rehabilitation and Training Exercises**  
Reference: F2I-PoC\_2016\_024  
PI: Slater, Melvyn  
Agency: Bosch i Gimpera Foundation of the University of Barcelona  
Duration: 01/01/2017-31/12/2017  
Amount: 25,000 €
- 7. Immersive Cerebral and Orthopedic Rehabilitation and Training Exercises**  
Reference: F2I-MiR\_2016\_002  
PI: Slater, Melvyn  
Agency: Bosch i Gimpera Foundation of the University of Barcelona  
Duration: 14/12/2016-13/04/2017  
Amount: 6,000 €

## Agreements

The Institute of Neurosciences of the University of Barcelona obtained a total of 640,759 € from national and international agreements during 2016. Specifically, 80,000 € were got through three international agreements and 560,759 € were got from 21 national agreements signed with public or private institutions out of which we highlight the Ministry of Justice of the Government of Catalonia, the Private Foundation Institut Guttmann, Institute for Biomedical Research of Salamanca, Esteve S.A., Mint Labs S.L., August Pi i Sunyer Biomedical Research Institute (IDIBAPS), among others.
