

EARLY STAGE RESEARCHER

Project: Study of brain changes induced by non-invasive brain stimulation as predictors of future brain health status in older adults

We are looking for an Early Stage Career (PhD student) to perform research associated to the Spanish Ministry of Science Innovation and Universities project "*Study of brain changes induced by non-invasive brain stimulation as predictors of future brain health status in older adults*" which will combine the use of neuroimaging techniques (MRI), non-invasive brain stimulation and neuropsychological testing.

The person will likely have to interact with the volunteers of the study and therefore Catalan/Spanish language proficiency is desirable.

Interested applicants please contact: dbartres@ub.edu / <http://www.ub.edu/bbslab/>
