

# NeuroSpring 2017

## *An IDIBELL Neuroscience Program workshop*

### **A journey through Parkinson's disease**

*Friday, 9<sup>th</sup> June 2017*

(Sala d'Actes Pau Viladiu de l'Hospital Duran i Reynals)

**10:30-12:30h** Neuroscience program speakers:

1. *"Pathogenesis of Parkinson's disease: Therapies and clinical trials"*  
**Jaume Campdelacreu**
2. *"Compulsiveness associated to Parkinson's disease treatment"*  
**Nuria Mallorquí & Carles Soriano-Mas**
3. *"Molecular pathology of the frontal cortex in sporadic Lewy body diseases (LBDs): iLBD, Parkinson's disease, dementia with Lewy bodies (DLB)"*  
**Isidre Ferrer**
4. *"Ecto-GPR37: a new biomarker for Parkinson's disease"*  
**Francisco Ciruela**
5. *"Modeling Parkinson's disease with patient-specific induced pluripotent stem (iPS) cells"*  
**Antonella Consiglio**

**12:30-13h** Coffee break

**13-14h** Invited speaker seminar:

*"Stem cells and direct reprogramming for Parkinson's disease cell replacement therapy and drug discovery"*

**Prof. Ernest Arenas**

*Laboratory of Molecular Neurobiology, Department of Medical Biochemistry and Biophysics, Karolinska Institutet, Stockholm, Sweden*
