

THE INSTITUTE

The Institute of Neurosciences of the University of Barcelona is a frontrunner in international neuroscience research, being one of the few institutes in the world that investigates the brain at every level. Director: Jordi Alberch

This includes research groups in neurobiology, neuropharmacology, pathophysiology, neurology, psychiatry, clinical psychology, neuropsychobiology and cognitive neurosciences.

The Institute has been awarded the **Maria de Maeztu Excellence Unit** accreditation, and gathers about 450

researchers from the Faculties of Psychology, Medicine, Pharmacy and Biology, and develops research activities at the University Hospitals located in the multicultural city of Barcelona.

The Institute promotes close collaboration between basic and clinical neuroscientists in all the research areas to tackle the biggest challenges in neurosciences.

We encourage and welcome collaboration with international research groups and organisations to boost the global vision of the Institute.

378 Publications — 1730 Impact Factor

4 Research professors
7 Academia professors

2 Advanced grants

MDM-2017-0729. Ministerio de Economía, Industria y Competitividad. Institute of Neurosciences of the University of Barcelona. 2,000,000€

Research Areas

Pathophysiology of Nervous System Diseases

Research in this area focuses on defining the pathophysiological mechanisms involved in the loss of normal and neuronal plasticity related to these diseases. A deeper understanding of neuronal connectivity and dynamics, signaling molecules, cell-cell interaction and epigenetic factors in the nervous system will enable us to devise new pharmacological targets for therapeutic strategies to prevent or delay nervous system diseases.

Cognitive and Behavioural Neuroscience

This research area addresses the cerebral circuits, networks, processes and computational mechanisms that underpin a plethora of functions, such as perception, attention, memory, language, decision making, emotion and the control of action.

Mental Health

Under a multidisciplinary approach, the Institute actively embraces the challenge of advancing mental health knowledge around underlying neurobiological mechanisms, cognitive and daily life functioning, and new treatments and therapies in psychotic and affective disorders in childhood, adolescence, and adulthood.

Experimental Neurology

This area is focused on the study of the nervous system in normal conditions and during neurologic disorders. This includes studies about the correlation between genetic markers, cerebrospinal spinal fluid biomarkers and structural, functional and molecular imaging in patients with movement disorders, dementia, autoimmune synaptic disorders and other neurological disorders.

Outstanding Publications in 2019

Esteve, P., Rueda-Carrasco, J., Ines Mateo, M., Jesus Martin-Bermejo, M., Draffin, J., Pereyra, G., Sandonis, A., Crespo, I., Moreno, I., Aso, E., Garcia-Esparcia, P., Gomez-Tortosa, E., Rabano, A., Fortea, J., Alcolea, D., Lleo, A., Heneka, M. T., Valpuesta, J. M., Esteban, J. A., ... Bovolenta, P. (2019). Elevated levels of Secreted-Frizzled-Related-Protein 1 contribute to Alzheimer's disease pathogenesis. *NATURE NEUROSCIENCE*, 22(8), 1258+.

Assaneo, M. F., Ripolles, P., Orpella, J., Lin, W. M., de Diego-Balaguer, R., & Poeppell, D. (2019). Spontaneous synchronization to speech reveals neural mechanisms facilitating language learning. *NATURE NEUROSCIENCE*, 22(4), 627+.

Royal, P., Andres-Bilbe, A., Prado, P. A., Verkest, C., Wdziekonski, B., Schaub, S., Baron, A., Lesage, F., Gasull, X., Levitz, J., & Sandoz, G. (2019). Migraine-Associated TREK Mutations Increase Neuronal Excitability through Alternative Translation Initiation and Inhibition of TREK. *NEURON*, 101(2), 232+.

Creus-Muncunill, J., Badillo-Rodriguez, R., Garcia-Forn, M., Masana, M., Garcia-Diaz Barriga, G., Guisado-Corcoll, A., Alberch, J., Malagelada, C., Delgado-Garcia, J. M., Gruart, A., & Perez-Navarro, E. (2019). Increased translation as a novel pathogenic mechanism in Huntington's disease. *BRAIN*, 142(10), 3158-3175.

Illan-Gala, I., Montal, V., Borrego-Ecija, S., Vilaplana, E., Pegueroles, J., Alcolea, D., Sanchez-Saudinos, M. B., Clarimon, J., Turon-Sans, J., Bargallo, N., Gonzalez-Ortiz, S., Rosen, H. J., Gorno-Tempini, M. L., Miller, B. L., Llado, A., Rojas-Garcia, R., Blesa, R., Sanchez-Valle, R., Lleo, A., ... Degeneration, F. L. (2019). Cortical microstructure in the behavioural variant of frontotemporal dementia: looking beyond atrophy. *BRAIN*, 142(4), 1121-1133.

Coombs, I. D., Soto, D., McGee, T. P., Gold, M. G., Farrant, M., & Cull-Candy, S. G. (2019). Homomeric GluA2(R) AMPA receptors can conduct when desensitized. *NATURE COMMUNICATIONS*, 10, 498,718€

Riba, M., Auge, E., Campo-Sabariz, J., Moral-Anter, D., Molina-Porcel, L., Ximelis, T., Ferrer, R., Martin-Venegas, R., Pelegri, C., & Vilaplana, J. (2019). Corpora amylacea act as containers that remove waste products from the brain. *PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE UNITED STATES OF AMERICA*, 116(51), 26038-26048.

Brito, V., Giralt, A., Masana, M., Royes, A., Espina, M., Sieiro, E., Alberch, J., Castane, A., Girault, J.-A., & Gines, S. (2019). Cyclin-Dependent Kinase 5 Dysfunction Contributes to Depressive-like Behaviors in Huntington's Disease by Altering the DARPP-32 Phosphorylation Status in the Nucleus Accumbens. *BIOLOGICAL PSYCHIATRY*, 86(3), 196-207.

Outstanding Projects

2,199,318€

Moments in Time in Immersive Virtual Environments (MoTIVE)

ERC-2016-ADG- 742989. European Union
Melvyn Slater

763,002€

Modulation of Tau seeding and pathology in tauopathies by BBB-nanocarriers, epitope selective vaccination and ectoPrP Tau receptor bodies (STOPTauPATHOL)

HR18-00452. Fundació Caixa de Pensions 'la Caixa'
Isidro Ferrer, Jose Antonio Del Rio

556,820€

A translational model of autoimmune synaptopathy: symptoms, brain networks, and the link to human memory

PIE16/00014. Instituto de Salud Carlos III
Josefa Castro

501,809€

Training for Advanced Stem Cell Technologies in Neurology (ASCTN-Training)

H2020-MSCA-ITN-2018-813851. European Union
Josep Maria Canals

498,718€

A Translational Model of Antibody-mediated Synaptic Disease: Symptoms, Neuronal Circuits, and the Mechanisms of Memory Loss and Recovery

HR17-00149. Fundació Caixa de Pensions 'La Caixa'
Josep Dalmau

459,800€

Nuevos enfoque para entender la patogénesis y la terapéutica de la Enfermedad de Alzheimer

SAF2016-76340-R. Spanish Ministry of Economy, Industry and Competitiveness
Eduardo Soriano

435,028€

Healthy minds from 0-100 years: Optimising the use of European brain imaging cohorts (Lifebrain)

H2020-SC1-2016-2017- 732592. European Union
David Bartres-Faz

326,700€

Modulación de la dinámica de las redes neuronales como estrategia terapéutica para recuperar la disfunción de los ganglios basales en las enfermedades del movimiento

SAF2017-88076-R. Spanish Ministry of Economy, Industry and Competitiveness
Jordi Alberch

271,040€

Nuevas aproximaciones para entender las funciones de la PrPC y miembros secretables de semáforinas durante el desarrollo del hipocampo y en neurotransmisión

RTI2018-099773-B-I00. Spanish Ministry of Economy, Industry and Competitiveness
Jose Antonio del Rio
